

AccSoft ERP

Mid-market ERP Solution

AccSoft ERP

AccSoft ERP is an integrated mid-market Enterprise Resource Planning software to handle all key financial & business applications of a company in an all-inclusive, neat and tidy manner.

It offers a full spectrum of features that handles all aspects of a business from Accounts Receivable, Accounts Payable and Inventory Control to a fully integrated General Ledger. Further it supports Manufacturing, Engineering and Workshop Management of a business Organization.

AccSoft ERP is readily geared to meet the financial management needs of an Organizations comprising of multiple companies, multiple locations and multiple departments.

AccSoft ERP is ready to adapt to suit the way your Organization works. It's able to integrate with your Organization's current workflow, while providing powerful controls to improve your financial & business management requirements.

Concept & Architecture of the AccSoft ERP is a result of fifteen years extensive market survey carried out by AccSoft Solutions (Pvt) Ltd. A team of Accountants and IT Professionals were instrumental in developing this global product.

In our market survey we found unique requirements by local customers which are not addressed in international packages. Features like Post-dated Cheques, Return Cheque Management, ever changing local tax regulations (VAT, NBT & SVAT etc.) are some of them. Additionally customers wanted very strict user controls to suit local environment which are all considered in AccSoft ERP. Further compliance with Accounting Standards is another important aspect of our Enterprise Resource Planning software.

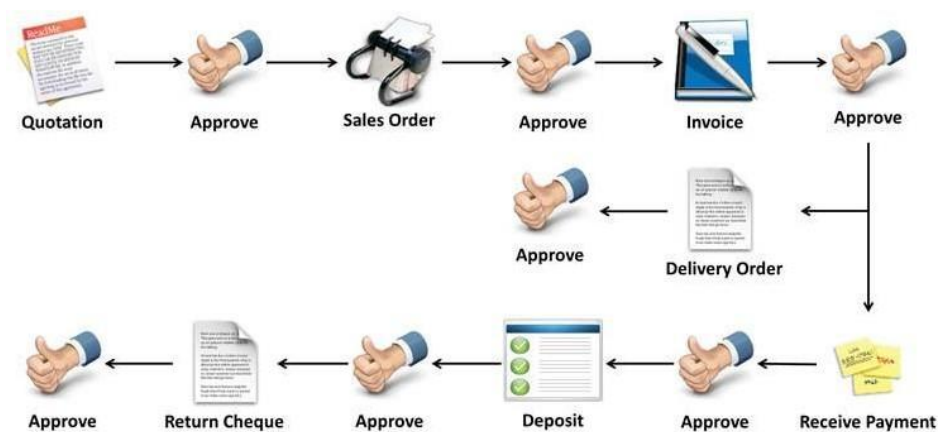

Key Features

- Sales Order Management & Receivables
- Purchase Order Management & Payables
- Advanced Inventory Control with Multiple Warehouse & Serial Number Tracking
- Advanced Accounting & Financial Management

Purchase Order Processing & Payables

Suppliers are key stakeholders in a business, and retaining reliable suppliers is important for business success. Losing good suppliers can be a weakness, and disrupt production and/or the delivery of services.

Supplier Chain Management is an on-going process within a business. It seeks to reduce risk in the purchasing process, and maximise value from the supply chain.

AccSoft ERP helps to manage the Supplier Chain with better informed decisions. Reports like Overdue Bills and Age Analysis will give a quick idea that needs attention to pay. Purchases history will give information with regards to which supplier sends goods on time and cheaper in price. Open Purchase Orders are useful in tracking orders not yet received.

General Features

VAT, SVAT & NBT Compatibility

AccSoft ERP is totally localised software which complies with local tax regulations. With ever changing and complex tax schemes AccSoft ERP moves you forward. Any future changes of tax regulations will be taken care of.

Job & Project Costing

AccSoft ERP provides allocation of income & expenses to Jobs & Projects which will enable to track profitability by each Job.

Comprehensive Audit Trails

Though editing transactions are not recommended, sometimes it may be useful for certain users to have privileged rights. Audit Trail will provide detailed activities of users.

Reminders

AccSoft ERP will provide alerts to users on important activities to be performed. Things such as Overdue Invoices and Supplier Bills, Items to Re-order, PD Cheques to deposit are few of them.

Handling Profit Centres

AccSoft ERP provides allocation of income & expenses to different Profit Centres which will enable tracking profitability by each segment of business.

Budgeting

With monthly Financial Budgeting it's easy to control Actuals and obtain a detailed analysis report.

User Password Management

A comprehensive User Security Management in AccSoft ERP will give controls up to field level. Administrator can set up users precisely with areas of access for transactions & reports.

Digital Document Approval to Enable Smooth Workflow in an Organisation

You may enable this feature for certain documents. This will control certain activities only with higher authority. Eg Exceeding Credit Limits, Invoicing for Unpaid Customers etc.

Multi User & Multi Company with Remote Access

Only the hard disk space is your limitation. AccSoft ERP supports Multiple Companies with unlimited users from anywhere. (Purchase of license required)

Exporting Reports

All reports are directly exportable to PDF, MS Office and Open Office.

Email Documents

It is possible to email any documents. This feature enables PO, Invoices etc. to be emailed directly without any hassle, which integrates with standard email client.

Supports Third-party Application Integrations

System supports seamless read and write access to third-party softwares. Which enable to plug-in other softwares to AccSoft ERP

Drill Down Reports

Extremely user-friendly feature which makes life easy. All AccSoft ERP reports can be drilled down up to source documents.

Backing up Data

Your company data is the most important thing which needs to be backed up on a daily basis. With AccSoft ERP's Easy Backup you may take backup of the data file without interrupting other's work. Also AccSoft ERP features a compulsory backup function which needs to be setup by an administrator. In given number of days if a backup is not taken it will alert users and after expiration of the stipulated number of days users are not allowed to log in to the system.

Advanced Reports & Graphs

AccSoft ERP has an inbuilt tool to customise reports, which allows the users to add fields, filter, group by criteria and formulas etc. With this powerful tool users can create own reports and memorise them for future use. Most of these reports are directly convertible to graphs.

Centres

With different Centres it is easy to find information all in one place. Eg: Customer Centre will provide all information related to Customers in one place. AccSoft ERP also provides Supplier, Inventory and Accounts Centres to make life easy.

Add-on Modules (to be purchased separately)

Multi Currency Compatibility

Expand your business internationally. With Multi Currency feature enabled you are not bound to transact in one currency.

Serial Number & Warranty Tracking

Now you can buy and sell items which needs to track Serial Numbers of products. At any time system will give stock balance detailed by Serial Numbers

Multiple Price Levels & Quantity Discounts

With AccSoft ERP now you can maintain Multiple Prices for one item which is linked to a customer (i.e. Whole Sale Price, Cash Price etc.). Also you can give Quantity discounts on purchasing to encourage customers to purchase more quantities.

Document Attachment Module

With AccSoft ERP it's possible to attach files to transactions and master files. A customer agreement could be attached to Customer File or an Invoice while a picture could be attached to the Item Master file.

Consolidation of Accounts

You may have multiple companies which needs to be amalgamated in order to see group results. AccSoft ERP will provide you with a Consolidated P & L and Balance Sheet

Fixed Assets Module

AccSoft ERP has a simple Fixed Assets Module which is not fully integrated. This enables users to maintain Fixed Assets register reconciled to the account balances. It calculates depreciation on periodic basis.

Auto Schedule & Email Reports

Each user may define what reports need to be emailed on given schedules. This helps as a reminder to go through important reports and would be useful if you are out of office.
